

NIT GSM's Core Values

Committed to discover and develop latent inner potential of students to ensure that they take on life's challenges in a professional and ethical manner.

Excellence:

NIT GSM pursues excellence in all of its actions: Scholarship, Research, Events, and services.

Wisdom of Entrepreneurship:

THE community can expect the Institute to play an active role in encouraging a sense of entrepreneurship and innovation. It wishes to be a central meeting place for entrepreneurs and researchers to discuss a unifying theme. Internally as well, the Institute creates an environment that encourages innovation. In order to realize this, employees are given the necessary freedom and means to develop breakthrough innovations, MBA education which may arise from individual creative minds and talents as well as from effective teamwork.

Integrity and independence:

NIT GSM is convinced that integrity is a fundamental value for every organization as well as for that organization's management. The community can expect in the Education Institute to contribute to the development of an ethical conscience in all its activities and in its relationship with all its stakeholders.

Preparing for a challenging tomorrow:

The 21st Century brings with it, the most dynamic environment. At NIT GSM, we leverage the competency of management and content to prepare for the challenges head on tomorrow in Education.

Synthesis:

NIT GSM added value can be found in the productive interaction between scientific knowledge and practical management experience. Students will find The Institute a professional partner for discussion and will be able to further develop their own ability to synthesis during meaningful dialogues with the institution and fellow students.

Diversity and Creativity:

NIT GSM respect individuality and self freedom. For its part, the institute wants to guarantee its clients an environment that respects and promotes diversity. This should increase their ability to deal with variety. We encourage and recognize creativity and innovations through critical and out of the box thinking.

Customer Engagement:

Students, participants, organizations and the community can rely on the institution to take their desires and needs as a basis for the development of educational programs and the definition and execution of research projects.
